

FLIGHT SESSION SHEET

(SE) CPL REDUCED 25 HOURS ([ENG] CPL SE 25)

Student Tadvi Aadil Julkiflakhan				Class
Flight 448530	Date 22/01/2020	Registration FNPT II	Flight Time 02:00	Landings 1

From : **LEMG**

To : **LEMG**

Preparation	STD
Assimilation	STD
Procedures	STD-
Aircraft handling	STD-
Initiative	STD
Interest	STD
Global evaluation	STD
Holding entry	

EXECUTED MANEUVRES

SIM 01 - FAMILIARIZATION WITH THE SIMULATOR; EMERGENCIES; INSTRUMENT BASICS I

Startup process	N/A
After the Startup: departure ATIS, ATC authorizations, instrument and equipment adjustments	STD
Taxiing: techniques and checkups during the taxiing (instruments and flight controls)	N/A
Run Up: procedure, error recognition and decision-making upon departure (go, no go)	STD
Briefing on IFR departure, normal takeoff and emergency	STD
Normal takeoff and climb to cruise altitude/level	STD
To power and to cruise altitude/level without exterior references:	STD
Straight and even flight maintenance	STD
Reference to the horizon and to the instruments	STD+
Changes in velocity at constant track and altitude	STD-
Straight and even flight in different flight settings.....	STD
Standard turns	STD
Banked turns 20°	STD
Banked turns 30°.....	STD
Banked turns 45°.....	STD
Climbs and descents at a constant regime of variometer	STD
Climbs and descents at constant regime and velocity	STD
Limited panel	STD
Radio aid identification and position determination	STD
DME arcs VOR & ADF	STD
Flying a hold practices VOR	STD
Flying a hold practices ADF	STD-
Flying a hold practices DME	STD
Emergencies:	STD
In the simulator: fire or smoke in a cabin.....	N/A
During takeoff due to misreading the anemometer, failure on takeoff PT	STD
During takeoff due to misreading engine parameters	STD
During takeoff due to failure on takeoff PE (anemometer, altimeter and variometer)	N/A
During takeoff above the safe altitude	STD

During takeoff below the safe altitude
In the aerodrome traffic circuit

STD
